## OUR STORY

For over 35 years, Trimlite has been committed to producing high quality interior and exterior door and glass products. Founded in Vancouver, British Columbia, we operate manufacturing facilities in four countries, along with distribution locations across North America. Managing one of the largest door distribution facilities in Western Canada, our team crafts and sells a wide range of doors to meet your specific requirements.

Our Fiberglass Door Brochure represents the full breadth of our partnerships with Plastpro and Mastergrain. We chose Plastpro because of their diverse product offering and commitment to producing high-quality fiberglass doors. Their product line has something for every architectural space and style.

We work with Mastergrain as their doors mimic the beauty of real wood without the hassle of maintaining it. Mastergrain is on the cutting edge of contemporary design and style. Additionally, their doors are made in Canada and we are well-positioned to distribute their door products into Western Canada.

At Trimlite, Handcrafted Construction meets Modern Design.

## CONSTRUCTION

- Handcrafted, our decorative glass panels stay true to their stained glass roots.
- Our selection of premium art glass and bevels, which makes our designs come to life, are hand cut and fitted. Careful consideration is given to choosing textures; complementing elements are crucial to a design's given appeal.
- Using solid metals, where all of the joints are soldered by hand, ensures the panels will be strong enough to withstand daily use.
- Once assembled, the panel undergoes a thorough cleaning and inspection process. This attention to detail is our assurance of quality to you.

## GLASS VARIATION

Decorative pattern glass is handmade. Through this process, slight imperfections or discolourations are inherent characteristics of all handcrafted glass. Bubbles or seeds, slight surface flaws and subtle variations in textures vary depending on the pattern. Some glass patterns, like Swirl and Drawn, are more likely to have these inclusions. They are not considered defects.
